Nurse Practitioner/Physician Assistant - Come Build Something Meaningful with Us and Make a Difference in Your Community!

Community Inclusion, Inc., a community-centered primary care and dental clinic in Jamestown, NY, is looking for a compassionate, personable Nurse Practitioner or Physician Assistant to join our growing community health center and help us expand access to quality primary care for patients who need it most. We offer a competitive salary and benefit package. We're looking for someone who:

- *Is compassionate, approachable, and patient-centered.
- *Is excited about helping grow and shape a developing primary care program.
- *Enjoys building genuine relationships with patients.
- *Wants to make a difference in an underserved community.
- *Values clinical autonomy while working collaboratively.

Why You'll Love Working with Us

Autonomy in Your Practice

We trust our providers to use their clinical judgment and practice medicine in a way that works best for their patients. You'll have the opportunity to build your own patient relationships while being part of a supportive team.

Flexibility That Fits Your Life

We understand that great clinicians have lives outside of work. We're open to discussing schedules and creating flexibility that works for you and those close to you.

A Mission You Can Believe In

Our mission is simple: increase access to quality primary care for underserved members of our community. You'll have the opportunity to treat patients who may otherwise struggle to access care and make an impact that extends far beyond the exam room.

HRSA/NHSC Loan Repayment Eligible

Our organization is committed to serving an underserved population and offers an opportunity to pursue HRSA/NHSC loan repayment, for eligible providers and qualifying positions.

A Team That Supports You

You won't be practicing alone. We're building a collaborative health care team that values communication, respect, education, and helping one another succeed.

If you've ever wanted to practice medicine where relationships matter, your clinical voice is valued, and you can see the direct impact of your work, we'd love to talk with you. Come be part of something bigger than a primary care practice. Come help us make our community healthier!

Starting annual salary commensurate with experience: \$118,497 – \$125,320.
